

Structure Plane

Information Architecture

Will consist of 4 pages including the home page. With navigation being stuck to the top center

Interaction Design

- User will be able to go to home page using logo home button will also be in navbar just to make it clearer to users
- Each heading will have a hover effect to make it clear to the user that the button has an action.
- There will be an indicator underneath the navbar elements to let the user know what page they are on.
- The Social links will have a hover effect to let the user know it's clickable they will then be sent to the corresponding link in a new tab.
